SUMMARY

Computer Science student passionate about building purposeful tech that solves real-life challenges. Experienced in crafting dynamic web apps and exploring backend logic through structured project work

EDUCATION

Bachelor of Technology in Computer Science and Engineering: (CGPA- 7.81 / 10) Abacus Institute of Engineering & Management	<i>West Bengal, India ,2022-2026</i>
Senior Secondary (Class 12)] (Percentage: 88%) U.G.M.K Girls' High School [WBCHSE]	<i>Asansol, West Bengal, 2022</i>
Secondary (Class 10) (Percentage: 87%) U.G.M.K Girls' High School [WBBSE]	<i>Asansol, West Bengal,,2020</i>

SKILLS

Technical Skills: C++, JavaScript, DSA, React.js, Node.js, Express.js, MongoDB, API Integration.

Tools: VS Code, Git, Github, Postman, MongoDB Compass, Excel.

Core Subjects: DBMS, Computer Networks, OOPs, Operating Systems.

PROJECTS :

1. InsiderJobs – Student Job Portal

Tech Stack: React.js, Node.js, Express.js, MongoDB, Clerk (Auth), Moment.js

Description:

- Developed a job platform where students create profiles, explore roles, and track job status.
- Integrated **Clerk** for seamless authentication and secure user session handling.
- Used **Moment.js** for intuitive date and time formatting on job listings.
- Engineered dedicated interfaces for recruiters and applicants, featuring a modern and adaptive design.
- Added functionalities such as vacancy posting, smart filters, profile customization, and tracking of applications.

2. StudyNotion – EdTech Platform for Online Learning

Tech Stack: React.js, Node.js, Express.js, MongoDB, Cloudinary

Description:

- Engineered a dynamic e-learning application where users can discover, purchase, and attend digital courses.
- Designed robust access control, allowing instructors to create content and learners to follow course progress.
- Integrated **Cloudinary** for efficient media management and optimized content delivery.
- Structured the front end using modular components powered by **React Hooks** and **Context API**.
- Managed backend **APIs** and ensured consistent data flow and storage using **MongoDB**.
